Health Promotion in Disadvantaged Families

We will be providing opportunities to “Get Families Moving”.

Many of our Families live in high rise buildings with limited access to outdoor areas and open space. Obesity is a growing problem in our area alongside the opportunities to access activities to keep fit and the ease of access to fast food shops.

We will be providing opportunities for our families to access sports and dance sessions, where the children and their parents can take part together. These sessions will encourage our families to become more active, learn about taking care of themselves and to see that it can be enjoyable
